Bachelor of Arts Major in Computer Science	**The University of British Columbia**	*Vancouver, BC*	09/2019 - 06/2023
Diploma (with Distinction) Computer Systems Technology	**British Columbia Institute of Technology**	*Burnaby, BC*	09/2015 - 12/2017

EXPERIENCE

Lounge Server — **Cineplex Cinemas** — *West Vancouver, BC* — 04/2019 - 08/2019

- Part of the initial opening VIP team
- Served numerous tables while adhering to proper sanitation, safety, and alcohol beverage control policies
- Delivered consistent, high quality guest services during regular and peak hours

Web Developer — **The Jibe** — *Vancouver, BC* — 07/2017 - 09/2017

- Worked on the continuation of a task application that pulls employee data through the Teamwork API
- Implemented a replication of Teamwork's 'Add New Task' functionality
- Integrated and developed the prototype feature to log time on individual tasks
- Worked on overall task displays and task management using RESTful API

Junior Software Developer — **Agreement Express** — *Vancouver, BC* — 05/2016 - 12/2016

- Developed client-based Selenium test scripts written in Java using TestNG and maintained with Jenkins
- Provided thorough bi-weekly quality assurance, reporting and logging any bugs against the core application
- Collaborated with professional services, business analysts, and project managers to build deliverables
- Wrote detailed documentation related to the Software Development Life Cycle (SDLC) of Agreement Express

PROJECTS

InsightUBC Querying — github.com/ubccpsc/310 — 01/2022 - 04/2022

- TypeScript | React | Mocha | Chai | Node | Express
- Provides detailed querying of UBC metadata relating to courses, rooms, buildings, and more
- Full-stack web development project split into four sprints; TDD, server-side development, dataset expansion, client-side development
- Effectively used GitHub's issue tracking, pull request, and code review features for iterations and sprint deliverables

Potluck Event Planner — expo.io/@mobilepotluck/potluck-project — 10/2017 - 12/2017

- Worked on a cross-platform application that aims to solve food wastage problems by providing a streamlined management experience
- Project was built from the ground up, consisting of 23 members divided into 4 main teams
- Implemented login and register functionalities
- Managed token-based authentication (token storage, decoding JWT)

OVCMT Scheduling Application — schedule.ovcmt.com — 01/2017 - 04/2017

- Provides comprehensive course/instructor management and in-depth schedule generation through drag and drop features
- Full-stack responsibilities
- Wrote detailed documentation on project scope, stage plans, weekly status reports, and meetings
- Outlined and delivered approaches to risk management

VOLUNTEER EXPERIENCE

Vancouver Infectious Diseases Centre — vidc.ca — *Vancouver, BC* — 09/2017 - 01/2018

- Redesigned, rebuilt, and maintained VIDC's previously outdated WordPress website
- Worked with technologies such as PHP, HTML5, CSS3, and Elementor
- Educated client on specific admin and guest use cases
